Education

Indian Institute of Technology, Kanpur

B.Tech in Electrical Engineering (DISTINCTION)

Minors in ALGORITHMS and ARTIFICIAL INTELLIGENCE

9.7/10

2014-2018

Work Experience

Software Development Engineer

ADOBE INC.

Bengaluru, India

July 2018 - Present

- Implemented numerous components of an integral iOS UI library used across Adobe's iOS apps
- Architected a process to modularize the components of the UI library, reducing the apps' binary size by around 5 MB
- Added support for background downloading in an Engagement SDK, thereby improving user experience
- Improved performance and launch time of dynamic paywalls, resulting in increased revenue due to greater engagement
- Improved several cloud-controlled features for the in-app messages shown to iOS users
- Implemented a batching+caching mechanism for analytics in an SDK for Universal Windows Platform
- Implemented a retry and re-connection logic around flaky inter-app communication for Universal Windows apps
- Implemented a user-facing request-access workflow for enabling collaboration in cloud documents

Research Intern

ADOBE INC.

Bengaluru, India

May 2017 - July 2017

- "Visualizing and designing a navigable interface for a large-scale image gallery on a 360 canvas": Given the problem area of Virtual Reality websites, surveyed existing work, brainstormed and chose the problem statement
- Proposed novel ways for image layout in virtual reality and implemented it for Samsung Gear VR in Unity
- Formed an Image similarity graph from a 150,000 image dataset using State-of-the-art techniques
- Wrote a Flask server for image search and nearest-neighbor requests, minimized the image retrieval lag and implemented a tag-based image search

Projects

Online MCMC based Bayesian Inference [Report]

COURSE PROJECT FOR TOPICS IN PROBABILISTIC MODELING AND INFERENCE

Prof. Piyush Rai

Jan'18-Apr'18

- Performed a survey of Online Markov Chain Monte Carlo methods, important for bayesian inference over a large dataset
- Studied Stochastic Gradient Langevin Dynamics (SGLD) method for online MCMC and the theory of Langevin dynamics
- Studied and implemented Stochastic Gradient Riemannian Langevin Dynamics (SGRLD), an extension of SGLD which overcomes its limitations in constrained settings

Grammatical Error Correction in Sentences [Report]

COURSE PROJECT FOR INTRODUCTION TO NATURAL LANGUAGE PROCESSING

Prof. Harish Karnick

Jan'18-Apr'18

- Implemented a LSTM based sequence-to-sequence (*seq2seq*) model using *keras* to correct grammatical errors in sentences, using LSTMs for encoding and decoding
- Trained and tested the *seq2seq* model on NUCLE dataset with sub-sampling and suggested improvements to improve the accuracy of correction

Brittle ML: Playing Satan

COURSE PROJECT FOR INTRODUCTION TO MACHINE LEARNING [Report]

Prof. Purushottam Kar

Aug'17-Nov'17

- Studied various models of adversarial attacks on Machine learning models, especially convolutional neural nets
- Successfully implemented a blackbox attack on Inception-v3 in Tensorflow to craft adversarial examples for images
- Attempted to break Ranking methods that use decision trees pursuing an approach mentioned in literature

Technical Skills

Languages C++, C++/CX, Objective C, Swift, Typescript, Python, Shell, \LaTeX

Frameworks/ Tools React, NodeJS, Cocoapods, Git, MATLAB

Achievements

- Received *Spot Award* in FY 2019-20 and 2020-21, and *Special Contribution Award* in FY 2021-22 for exemplary contributions to critical projects at Adobe
- Received *Academic Excellence Award* for outstanding academic performance (among top 7% students) for three consecutive academic years —2016-17, 2015-16 and 2014-15
- Secured All India Rank 317 in JEE Advanced 2014 and All India Rank 121 in JEE Main 2014
- Selected among the top 5 ideas for developing a game during Microsoft's Code.Fun.Do 2016 hacakthon
